 ● ● **Brazil**

Geography Things

River

A river is a ribbon-like body of water that flows downhill from the force of gravity.
Ocean

The ocean is a huge body of saltwater that covers about 71 percent of Earth's surface.
Geography Things

Lake

Lake is any relatively large body of slowly moving or standing water that occupies an inland basin of appreciable size.

Geography Things

Mountain

A mountain is an elevated portion of the Earth's crust, generally with steep sides that show significant exposed bedrock.

Geography Things

Valley

A low area of land between hills or mountains, typically with a river or stream flowing through it.
Island

An island is a body of land surrounded by water.

Geography Things

Desert

A desert is a barren area of landscape where little precipitation occurs and, consequently, living conditions are hostile for plant and animal life.
Jungle

A jungle is land covered with dense forest and tangled vegetation, usually in tropical climates.

Geography Things

Hills

A hill is a piece of land that rises higher than everything surrounding it. It looks like a little bump in the Earth.

Volcano

A volcano is an opening in the earth's crust through which lava, volcanic ash, and gases escape.

Geography Things

Waterfall

A waterfall is a point in a river or stream where water flows over a vertical drop or a series of steep drops.

Plain

A plain is a flat expanse of land that generally does not change much in elevation, and is primarily treeless.

Compass

N = North
S = South
E = East
W = West
